Elizaveta Sheremetyeva

Oxford, UK • +44 7572 751651 • elizaveta.sheremetyeva@gmail.com

Skills

Programming Languages: Python, C++, C, Java, Scala, Kotlin, TypeScript, Haskell, Assembly
Machine Learning: JAX, TensorFlow, NumPy, PyTorch
Other Computing Skills: LaTeX, Linux, Git, Arduino
Languages: English, Russian

Education

AI for Digital Healthcare - UKRI Centre for Doctoral Training 2024-2028
PhD Student (Expected graduation 09/28)
Imperial College London 2020-2024
MEng Mathematics and Computer Science (1st Class)

Publications

1. **Hanassab, S., Sheremetyeva, E.**, et al., "AlphaGo or beta-hCG: A reinforcement learning framework for assisted conception," *ICLR Workshops XAI4Science (Explainable AI for Science) & AI4CHL (AI for Children)*, 2025.
2. **Sheremetyeva, E.** et al., "Impact of age, ethnicity and bodyweight on the prevalence of polycystic ovarian morphology" *American Society for Reproductive Medicine (Oral Abstract)*, 2025.

Work Experience

Software Engineer Intern, Google June 2023 - Sept 2023

- Actively worked with the Device Bound Session Credentials Chrome team, tackling features and bugs crucial to the project launch. Contributed code in C++.

Software Engineer Intern, DeepMind June 2022 - Sept 2022

- Investigated novel applications of computation and machine learning to advancing mathematical research. Fast understanding of related discipline knowledge and internal development process.

Intern, Reaction Engines April 2019 - May 2019

- Created an economic model assessing sustainable hydrogen production, storage and use, presenting findings to engineering team.

Projects

Masters Project: Reinforcement Learning for IVF Nov 2023 - June 2024

- Optimised medical treatment using Markov Decision Processes and reinforcement learning.

Designing for Real People May-June 2022

- Developed a Chrome extension improving dyslexia accessibility using TypeScript.

WACC Compiler Jan-Mar 2022

- Built a WACC language compiler using Scala with continuous integration and deployment toolsets.

PintOS Oct-Nov 2021

- Created an operating system framework for the 80x86 architecture in C, implementing kernel threads and user programs.

ARM Assembler and Emulator May-June 2021

- Developed an ARMv6 assembler and emulator in C, using Agile methodologies.

Leadership & Volunteering

Hall Senior, Imperial College London 2021-2024

- Managed student welfare and organized events for up to 500 attendees.

Co-President, Imperial College Women in Computing 2020-2022

- Expanded community engagement, organizing multi-university collaborative events.

Volunteer, Summertown Library 2018-2019

- Assisted customers with technology and database management weekly.

Achievements

- CGCA & Old Centralians' Trust Student Activity Award (2021)
- IET Charles Belling Diamond Jubilee Anniversary Scholarship (2020-2024)
- GIAC Certified Incident Handler (2020)
- FDM Everywoman in Technology Awards, One to Watch category - Highly Commended Finalist (2020)
- Duke of Edinburgh's Award - Gold, Certificate of Achievement (2020)
- European Youth Chess Championships, England Representative (2014, 2015, 2018)
- Gold CREST Award (2019)
- Arkwright Engineering Scholarship (2018-2020)
- GDST Head's Scholarship (2018-2020)
